How to Set Up PayPal Instant Payment Notification with PHP

Every e-commerce website needs a payment processing system, and PayPal is the most widely used processing system in the world. If you're a web developer, being able to implement a PayPal Instant Notification System is a must have skill for your toolbox.

What Is PayPal IPN?

PayPal IPN is used for managing orders and creating transaction reports. Instant Payment Notification is a message service that automatically notifies merchants of events related to PayPal transactions. Merchants can use it to automate back-office

and administrative functions, like fulfilling orders and providing customers with order status.

Audience:

Every web developer on the planet! To take this course you should have a basic knowledge of PHP programming.

Pre-requisites:
