Course Duration: 2 Hours

SharePoint Online Site Manager - Beginner II

About this Course:

SharePoint is a web-based platform designed to facilitate more effective communication and collaboration on projects, within teams, as well as improve standard day-to-day operations.

Course Objectives:

- Become proficient in the foundational concepts necessary to build, manage, and support a SharePoint Online site. This course has been designed from start to finish to provide the latest information on tools available, as well as effective strategies for implementation in the areas of metadata, permissions, site structure, and more.

Audience:

- This course was designed for those tasked with managing a SharePoint site or site collection. Its for individuals intending to get an in-depth, hands-on understanding of what's possible in SharePoint Online, including potential site owners, power users, support professionals, and portal designers. Users looking to specialize in SharePoint environments are also recommended to take this course.
