Learning Style: On Demand

Technology:

Difficulty: Intermediate

Course Duration: 3 Hours

Starting with Webpack

About this Course:

Any IT professional or casual developer anticipating a solid understanding of how Webpack works in open-sourced and private application development projects needs to go through this course and absorb all of its content. Anyone desiring to learn how Webpack is implemented in web application projects needs the

knowledge, demonstrations, and practice presented in this course. This not only includes web, mobile, and service application developers, but also architects, UI designers, testers, and administrators. This course provides a solid understanding of how to effectively participate in a project leveraging Webpack and the bundled deployment packages it produces.

Prerequisites:

- Before taking this course, a student should ideally (but not absolutely) have: A at least a modest knowledge of HTML, web server use and configuration, and JavaScript design patterns. Ideally, the student should be familiar with creating web applications on npm enabled platforms, frameworks, and libraries.

Course Outline:

This Course Includes:

- Welcome to Starting with Webpack
- Preparing for Webpack
- Using Webpack
- Additional Webpack Support

Credly Badge:

Display your Completion Badge And Get The Recognition You Deserve.

Add a completion and readiness badge to your LinkedIn profile, Facebook page, or Twitter account to validate your professional and technical expertise. With badges issued and validated by Credly, you can:

- Let anyone verify your completion and achievement by clicking on the badge
- Display your hard work and validate your expertise
- Display each badge's details about specific skills you developed.

Badges are issued by QuickStart and verified through Credly.
