Learning Style: On Demand

Technology:

Difficulty: Beginner

Course Duration: 3 Hours

Starting with React.js

About this Course:

This React online course was designed with web developers in mind. If you design UI/UX solutions for mobile or the web, learning React.js will vastly improve how you work. And if you want to design with React as easily as with other JavaScript frameworks, this course is a must.

This course focuses on building simple components and composing them to create complex, rich, functional component solutions. You'll get to grips with event handling, routing, implementing Flux architecture, and much more to master React fundamentals.

We start from the very beginning and stick with you every step of the way, kicking off with an introduction to React and getting progressively more challenging as the course continues. Don't worry – you'll soon be working on React projects with ease.

Course Objectives:

- Understand and use React components
- Code a React app with an online IDE
- Learn how React can help you as a developer
- Style a React app with React CSS and Bootstrap
- Use Flux, State and Props, Routers and more

Course Outline:

This course Includes:

- Introduction to the Course
- Starting with React
- React Components
- React State & Props
- React Event Handling
- Routing in React
- React Flux
- Styling React
- Course Conclusion

Credly Badge:

Display your Completion Badge And Get The Recognition You Deserve.

Add a completion and readiness badge to your Linkedin profile, Facebook page, or Twitter account to validate your professional and technical expertise. With badges issued and validated by Credly, you can:

- Let anyone verify your completion and achievement by clicking on the badge
- Display your hard work and validate your expertise

- Display each badge's details about specific skills you developed.

Badges are issued by QuickStart and verified through Credly.
